

# LUNCH TALK

# THE IMPACT OF USING ALGORITHMIC TOOLS IN THE JUDICIARY

## Date

Thursday  
March 7, 2024

## Time

12:45 p.m.—1:45 p.m.

Lunch will be provided  
to those who register.

## Location

WA10

This event is for the  
NYLS community only.  
Outside visitors will not  
be admitted.

Judicial systems around the world are increasingly using algorithmic tools to enhance their efficiency and facilitate a wide range of tasks. But without adequate oversight and accountability comes the risk that such tools can negatively affect individual rights, judicial impartiality, and separation of powers, among other rule-of-law principles. Moreover, the very nature of the act of judging, and the normative value we attach to it, can be impacted, too.

In her talk, **Nathalie Smuha** — a legal scholar and philosopher at the KU Leuven Faculty of Law (Belgium) and currently an

Emile Noël Fellow in the Jean Monnet Center for International and Regional Economic Law and Justice at New York University Law School — will examine these concerns.
